Three Months Ended March 31, 2023
Dated: May 25, 2023

Financial Highlights

Three months ended March 31, 2023 compared with three months ended March 31, 2022

The Company's net loss totaled \$555,478 for the three months ended March 31, 2023, with basic and diluted loss per share of \$0.00. This compares with a net loss of \$1,533,927 with basic and diluted loss per share of \$0.01 for the three months ended March 31, 2022. The Company had no revenue in both periods presented. The decrease in net loss was principally due to:

- Mineral property expenses of \$37,898 for the three months ended March 31, 2023, is lower than mineral property expenses of \$956,341 for the three months ended March 31, 2022. Refer to the heading "Mineral Exploration Properties" below for a summary of the Company's exploration expenditures.
- Professional fees increased in the three months ended March 31, 2023, to \$172,246 compared with \$158,589 for the same period in 2022, primarily due to higher corporate activity requiring external professional support services.
- Unrealized gain on change in fair value of marketable securities decreased in the three months ended March 31, 2023, to \$7,000 compared with an unrealized gain of \$10,500 for the same period in 2022. The decrease in unrealized gain was due to the change in fair value of marketable securities.
- All other expenses related to general working capital purposes.

All other expenses related to general working capital purposes.

The Company's total assets as of March 31, 2023 were \$8,577,608 (December 31, 2022 - \$7,094,233) against total liabilities of \$465,046 (December 31, 2022 - \$441,481). The increase in total assets of \$1,483,375 resulted from cash spent on exploration and evaluation expenditures and operating costs which was offset by cash proceeds of \$2,013,344 from subscription receipts. The Company has sufficient current assets to pay its existing liabilities of \$465,046 on March 31, 2023.

Liquidity and Capital Resources

The Company believes that its cash and cash equivalents of approximately \$7.8 million as of March 31, 2023 is adequate to cover current expenditures and exploration expenses for the coming year.

In addition, on March 30, 2023 and April 14, 2023, the Company announced that it closed the first and second tranche respectively of a non-brokered private placement of subscription receipts. The gross proceeds received under the two tranches combined with those to be received pursuant to subscription commitments secured by the Company will result in aggregate gross proceeds of \$6.89 million.

The Company may, from time to time, when marketing and financing conditions are favourable, seek additional financing to fund exploration and property acquisition projects.

Three Months Ended March 31, 2023
Dated: May 25, 2023

The Company has commenced evaluating strategic opportunities to add shareholder value through merger and acquisitions or by acquiring projects directly. The Company will focus primarily on silver projects and opportunities in the Americas; however, the Company may explore opportunities in other regions or with a focus on minerals other than or in addition to silver if advantageous to the Company. The activities of the Company are financed through the completion of equity transactions such as equity offerings and the exercise of stock options and warrants. There is no assurance that equity capital will be available to the Company in the future in the amounts or at the times desired or on terms that are acceptable to the Company, if at all. See "Risks and Uncertainties" below.

As of March 31, 2023, and to the date of this Interim MD&A, the cash resources of the Company are held with certain Canadian chartered banks.

Regardless of whether the Company discovers a significant silver deposit, its working capital of \$8,112,562 as of March 31, 2023 is anticipated to be adequate for it to continue operations for the twelve-month period ending March 31, 2024.

Cash Flows

As of March 31, 2023, the Company had cash and cash equivalents of \$7,824,485. The increase in cash and cash equivalents of \$1,218,494 from the December 31, 2022 cash and cash equivalents balance of \$5,293,110 was a result of cash outflows in operating activities of \$795,121 and cash inflows in financing activities of \$2,013,344.

Operating activities were affected by adjustments of foreign exchange of \$1,673, unrealized gain on change in fair value of marketable securities of \$7,000 and net change in non-cash working capital balances of \$234,316 because of an increase in sale taxes receivable of \$8,300, an increase in prepaid expenses of \$249,581 and an increase in trade payables of \$23,565.

Cash provided by financing activities was \$2,013,344 for the three months ended March 31, 2023. Financing activities were affected by the proceeds from subscription receipts of \$2,013,344.

Mineral Exploration Properties

Property Description

San Diego Property, Mexico:

Golden Tag owns a 100% interest in the San Diego Property. The project was advanced through various exploration programs between 2005 and 2016 which included 6 Phases of surface diamond drilling totaling 32,933 metres ("m"). Phase 7 of diamond drilling commenced in October of 2020 culminating in 10,558 m completed in 24 holes by the end of 2022. The total amount of drilling completed on the property to the end of 2022 is 43,491 m.

The San Diego Property consists of 4 mining concessions (91.65 hectares) in the Municipality of Cuename, Durango State, Mexico. It is located approximately 75 km southwest of the city of Torreon,

Mexico and is 12 km northeast of Peñoles Velardeña Mine. The Peñoles non-ferrous metallurgical complex (smelting and refining) is in Torreon. The property can be accessed via a 10 km dirt road from the village of San Diego, which is only 5 km east of Highway 400 and Federal Road 49.

The property lies within the Velardeña Mining District where several mines have produced silver, zinc, lead and gold over the past century from polymetallic mineralization associated with intermediate to felsic intrusive bodies. The mineral deposits of the Velardeña Mining District consist primarily of quartz-calcite veins with associated silver, lead, zinc, gold and copper mineralization typical of the polymetallic, intrusive related skarn and low-sulfidation epithermal deposits of northern Mexico.

A Mineral Resource Estimate was completed by SGS Canada and an Independent Technical Report prepared in accordance with National Instrument 43-101 *Standards of Disclosure for Mineral Projects* of the Canadian Securities Administrators ("NI 43-101") was published in April 2013. This report is available on the Company web site as well as at www.sedar.com. The Estimated Indicated and Inferred Resources at San Diego from this Mineral Resource Estimate are summarized in Table 1.

Zn and Pb are excluded from Ag.EQ for oxide resources and Cu and Au are excluded from Ag.EQ for sulfide resources. Please refer to Table 30 & Pages 103-104 of the report for more information. (4) Pb and Zn are excluded from oxide vein resources due to lack of metallurgical tests illustrating their potential recoveries. (5) Totals may not add up precisely due to rounding. (6) (Mt): million tonnes; (M oz): million ounces.

Cautionary Statement: Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. The resource estimate for the 21 veins and mineralized body were defined by a drill pattern and applying reasonable geological shapes to limit the lateral extent of the veins and mineralized body. Combinations of cross sectional and plan level views were used in order to develop an understanding of the structural relationship and cut off grades were applied. The indicated and inferred categories were partially based on historic structures that consistently exhibit lateral continuity and constant thickness, many

of which can be traced along surface for hundreds of metres. There are no known factors such as environmental, permitting, legal, title, taxation, socio economic, marketing, political or other relevant factors which could materially affect the resources.

SGS Canada also recognized that there is Additional Target Potential of between 20 to 50 million tonnes grading 100 to 150 g/t silver equivalent. This Additional Target Potential is conceptual in nature as there has been insufficient exploration to define a mineral resource and it is uncertain if further exploration will result in the target being delineated as a mineral resource.

The Company's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in such certificate. Investors should be aware that inherent limitations on the ability of the Company's certifying officers of a venture issuer to design and implement, on a cost-effective basis, DC&P and ICFR may result in additional risks to
